-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 1618

Claims 7-11 are presented for examination.

The amendments and remarks filed on March 24, 2005 have been received and entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 7-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ding et al. (U.S. Patent 5,981,607).

Ding et al. teach an emulsion of higher fatty acids in combination with emulsifying agents for the treatment of dry eye symptoms caused by organic diseases or contact lenses. Castor, corn and sunflower oil are disclosed as being suitable. See column 3, lines 33-48 and column 4, lines 46-62. The above reference differs from the claimed invention in the addition of the fatty acids to a contact lens and then placing the contact lens in the eye as a protective film. It would have been obvious to a person skilled in the art to use different means of administration for an ophthalmic product. One skilled

Art Unit: 1618

in the art would have been motivated to employ the teachings of the above reference, since it relates to the use of the claim designated fatty acids as a lubricating agent for the treatment of dry eye. The use of different means for administering a compound in the eye is considered to be within the skill of the artisan in the absence of evidence to the contrary.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant in his remarks argues that the prior art teaches the addition of polysorbate 80 to fatty acid glycerides. Applicant further argues that the claims of the instant application are drawn to consisting essentially of a glyceride. The arguments are not well taken. There is no evidence of record to demonstrate that the addition of polysorbate 80 to applicant's composition would materially change the nature of such composition. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 7-11 are properly rejected under 35 U.S.C. 103.

The amendments of March 22, 2005 necessitate the new ground of rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1618

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
